

DEVARSH LOKWANI

Graduate Software Engineer | Full-Stack Developer (React · TypeScript · Node.js)

Sydney, NSW · +61 466 410 230 · devarshlokwani480@gmail.com · [LinkedIn](#)

PROFESSIONAL SUMMARY

Penultimate-year Information Technology student at Macquarie University (majoring in Artificial Intelligence) with production software engineering experience building end-to-end web and mobile applications. Recently shipped features across a full-stack CRM as part of a 6-person Agile team, working from backend APIs through to the user interface with React, TypeScript, and Node.js. Comfortable owning a module end to end, writing clean maintainable code, collaborating in version-controlled team workflows, and translating business requirements into working software. Seeking a graduate software engineering role to contribute to real-world products and grow technical depth.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frameworks & Libraries: React, React Native, Node.js, Express.js, REST APIs, Tailwind CSS, GSAP, Pandas, NumPy, Matplotlib

Databases: MySQL, MongoDB, Microsoft Access, schema design, queries, relationships, reporting

Cloud & DevOps: AWS (Cloud Practitioner), Git, GitHub, Vercel, Render, Vite, npm, pip, Agile/Scrum, software development lifecycle (SDLC)

Design & UX: Figma, UX research, wireframing, prototyping, competitive analysis, survey design

Data & AI: Data analysis, KNN classification & regression, generative AI integration, prompt engineering, LangSmith

Tools & Platforms: VS Code, Jupyter Notebook, Microsoft 365, MySQL Workbench

EXPERIENCE

Software Engineer - Robotic Marketer

Feb 2026 – Jul 2026

Sydney, NSW

- Owned the Contacts module of a fully interconnected CRM for an AI marketing platform, delivered by a 6-person Agile team, contributing across the stack from backend APIs to the React front end.
- Shipped full CRUD, bulk actions, and soft delete/restore end to end, plus CSV import/export pipelines with live preview, improving data-management workflows for B2B, B2C, eCommerce, and Education clients.
- Designed Contacts to auto-link with Accounts and Opportunities so lead conversion creates linked records in a single step, with every action logged to a shared activity timeline for full audit traceability.
- Built persona-driven contact classification and buying-group tracking to power Account-Based Marketing, collaborating through code reviews and version control in a fast-paced delivery environment.

Store Team Member (Sole Operator) - 7-Eleven

Apr 2025 – Present

Sydney, NSW

- Operate the store independently during solo shifts, demonstrating autonomy, accountability, and problem-solving under pressure in a high-traffic environment.
- Manage end-to-end operations, POS transactions, customer service, inventory, cash handling, and compliance checklists, applying standardised procedures in a time-critical setting.

Team Member & Crew Trainer - KFC Australia

Nov 2023 – Present

Sydney, NSW

- Selected as Crew Trainer to onboard and upskill new team members, producing training notes, walking trainees through workflows, and answering operational questions.
- Recognised consistently by customers and supervisors for reliability and performance under pressure during peak service periods.

Digital Marketing Intern - Renaissance Educare

Apr 2023 – Jun 2023

India

- Managed social media platforms and analytics dashboards, increasing audience engagement by 40% over 6 months through data-informed content strategy.
- Conducted competitor analysis and executed email marketing workflows with measurable conversion outcomes; awarded Intern of the Month for initiative.

KEY PROJECTS

Foundr - Full-Stack Finance-Tracking Web App - [Live](#) · [GitHub](#)

2026

Solo project, TypeScript, Node.js, Express, MongoDB, Lit, Vite

- Designed and built a live, deployed finance-tracking web app for solo founders that turns manual records into clear metrics, burn rate, runway, ROI, and margins; shipped with an open public waitlist during pre-launch.
- Architected a decoupled full-stack system: a static TypeScript/Lit landing frontend on Vercel and an independent Node.js/Express waitlist API on Render, backed by MongoDB Atlas via Mongoose.

- Implemented a rate-limited REST waitlist endpoint, GSAP/ScrollTrigger scroll animations, and separate Vite build configs so the pre-launch site ships without exposing unfinished features; codebase is 95% TypeScript.

Sigma DogCare - UX/UI & React Native App - Macquarie University 2025

- Conducted user research and stakeholder interviews to define requirements for a dual-interface mobile app; translated findings into Figma wireframes and high-fidelity mockups.
- Built a functional React Native prototype covering authentication, booking management, real-time tracking, and payment flows; delivered a client-style design walkthrough.

Pokédex - Relational Database System - Macquarie University 2025

- Architected a multi-table relational database and wrote complex SQL queries managing inter-table relationships and aggregate reporting.
- Replicated and validated queries across MySQL Workbench and MongoDB to demonstrate cross-platform database proficiency.

Portfolio Website - Full-Stack Personal Project - Personal 2025 – Ongoing

- Designed and built a personal portfolio site using React, JSX, HTML5, CSS3, and JavaScript; implemented scroll animations with GSAP and backend routing with Express.js and Node.js.

Large-Scale Data Analysis - Python & Machine Learning - Macquarie University 2024

- Analysed real-world datasets in Jupyter Notebooks using KNN classification and regression; used Pandas, NumPy, and Matplotlib for wrangling, statistical analysis, and visualisation.

Veritree - AI Business Analysis & Stakeholder Modelling - Macquarie University 2025

- Performed a full Business Model Canvas analysis of an AI-powered enterprise, including stakeholder mapping and adoption analysis using the UTAUT framework and EU AI Act risk classification.

EDUCATION

Bachelor of Information Technology (Major: Artificial Intelligence) - Macquarie University, North Ryde NSW *Jul 2023 – Jul 2026 (Expected)*

- Relevant coursework: Software Engineering, Database Management, Human-Computer Interaction, Data Analytics, Project Management & Professional Practice.
- Highest Achievement Award, COMP3760 Enterprise Systems Integration. Student Representative for COMP1010, liaising between students and faculty to improve course delivery.
